

# BLOTriX Reader

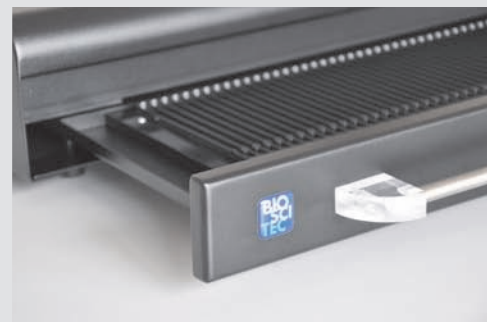

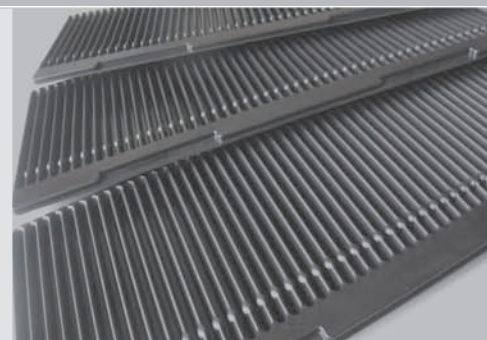

## At a Glance

The **BLOTriX Reader** is the first device of its kind worldwide. Immunoblot teststrips are digitalized straight from their wells in a washer tray through employment of innovative 3D Scan Technology. No cumbersome and time-consuming handling of single teststrips is required any more and image generation becomes a matter of seconds.

Results can be directly transferred, analysed and archived in the **BLOTriX Software**.

With this system, diagnostic laboratories are offered a complete solution for digitalization, evaluation and archiving of immunoblots for the first time.

- > Innovative 3D Scan Technology
- > Digitalization of immunoblot teststrips in 30 seconds
- > No handling of single strips required
- > Controlled directly from within the **BLOTriX Software**
- > Compatible to Profiblot™ - and BeeBlot Trays™
- > Processes up to 50 Strips in one operation
- > Increase in efficiency of up to 75%

**Strip images in the twinkling of an eye**

Finally, your immunoblot teststrips can be reliably digitalized with two steps only.

**-> scan -> analyse -> archive**
